### DETAILED ACTION

1. The amendment filed 4/19/05 has been received and considered. Claims 1-5, 7, 8, 10-17, 19 and 21-26 are presented for examination.

#### *Allowable Subject Matter*

2. Claims 1-5, 7, 8, 10-17, 19 and 21-26 are allowed.

3. The following is an examiner's statement of reasons for allowance:

While Nawathe et al (U.S. Pat 5,647,986) discloses an irrigation system comprising a communication system that sends usage data from the controller to a government agency, Collins (U.S. Pat 6,402,048) teaches an irrigation controller connecting to and exchanging information with a government agency and Peek et al (U.S. Pat 6,343,255) teaches connecting to and exchanging information with a plurality of weather stations through various means of public packet switched networks and it is also well known that government agencies such as the National Weather Service and the National Oceanic and Atmosphere Administration operate and maintain weather stations, none of these reference taken either alone or in combination with the prior art of record disclose an irrigation system, including:

“a communications system that sends at least one of a start time, irrigation water flow data, and irrigation water pressure data from the irrigation controller to a government agency”, and

“coupling the irrigation controller and a government agency using the first communication system, and sending at least one of a start time, irrigation water flow data, and irrigation water pressure data from the irrigation controller to a government agency”,

in combination with the remaining elements and features of the claimed invention. It is for these reasons that the applicant's invention defines over the prior art of record.
